

## Lab 1 - Getting to Know The Navigator Toolbar

In this lab we're going to learn the basics of ATT&CK Navigator by getting to know the toolbar.

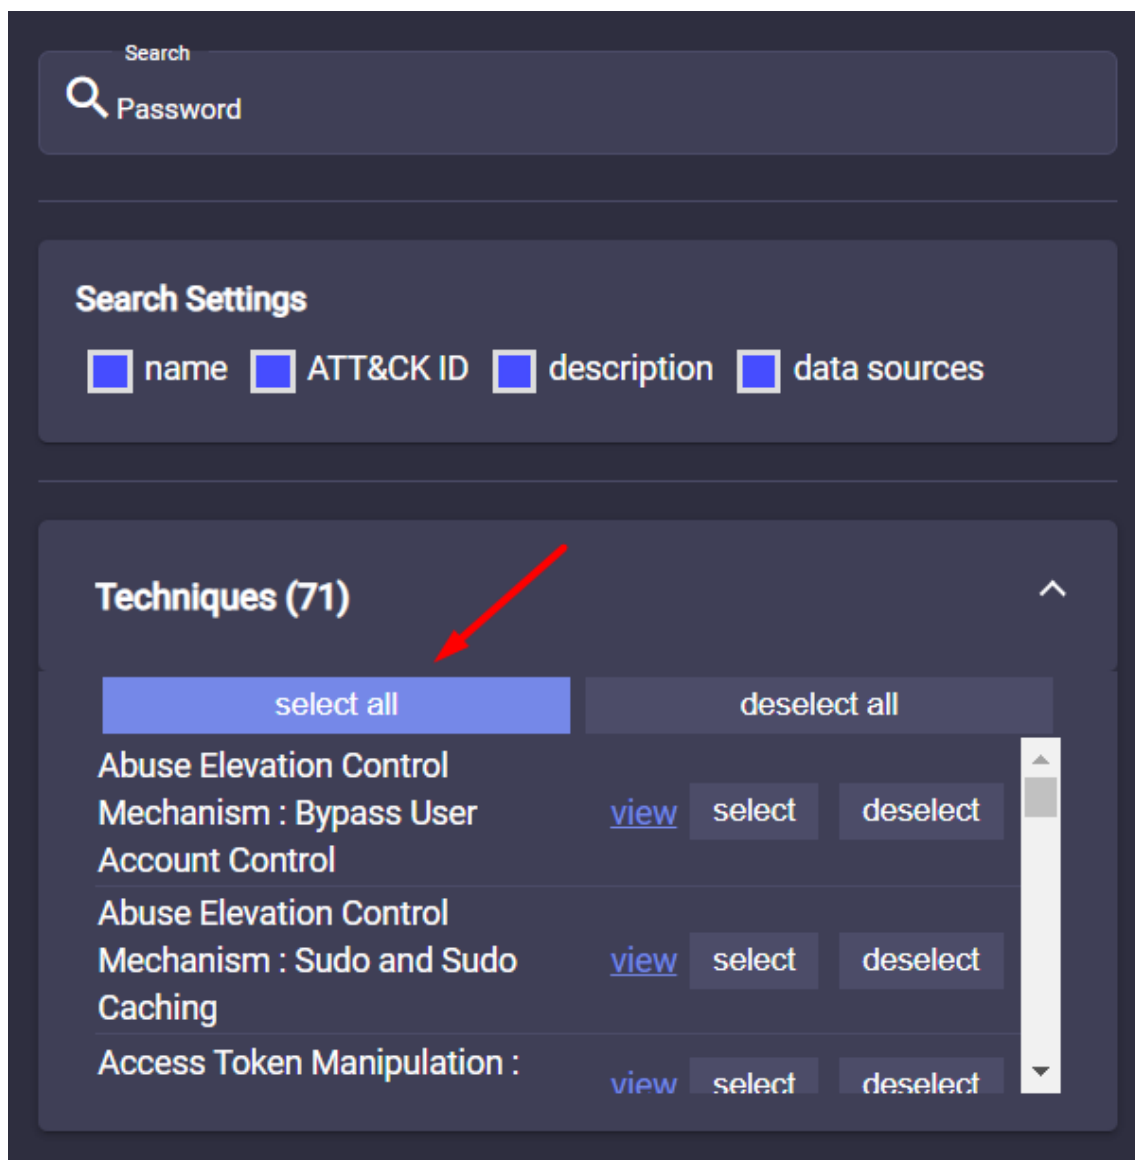

1. Click on Create New Layer.
2. Expand More Options.
3. Select version 14.
4. Select the Enterprise domain.
5. Click the button "Create layer from version".

6. Use the search button under selection controls and search for the term "Password".

7. Click the “**select all**” button.

8. Using the background color button under technique controls, change the background color of your selection from the steps before to red.
9. Click the toggle state button to disable the selection techniques.
10. Click the show/hide disabled button to hide the disabled techniques from view.
11. Click the show/hide disabled button to show the disabled techniques in the view.
12. Click the toggle state button to enable the selected techniques.

13. Rename the Navigator Layer from “layer” to “Password”.
